Focus Shield

Keeping your business protected

As a small business owner, we know you want to be focusing on what is important: growing the firm and boosting your bottom line. Addressing the health and security of a firm can sometimes take up valuable time, but if pushed to one side, can leave you vulnerable and wide open to no end of cyber-attacks and security nightmares.

That's why we've launched Focus Shield, to give you the level of protection you need, while saving time, money and hassle.

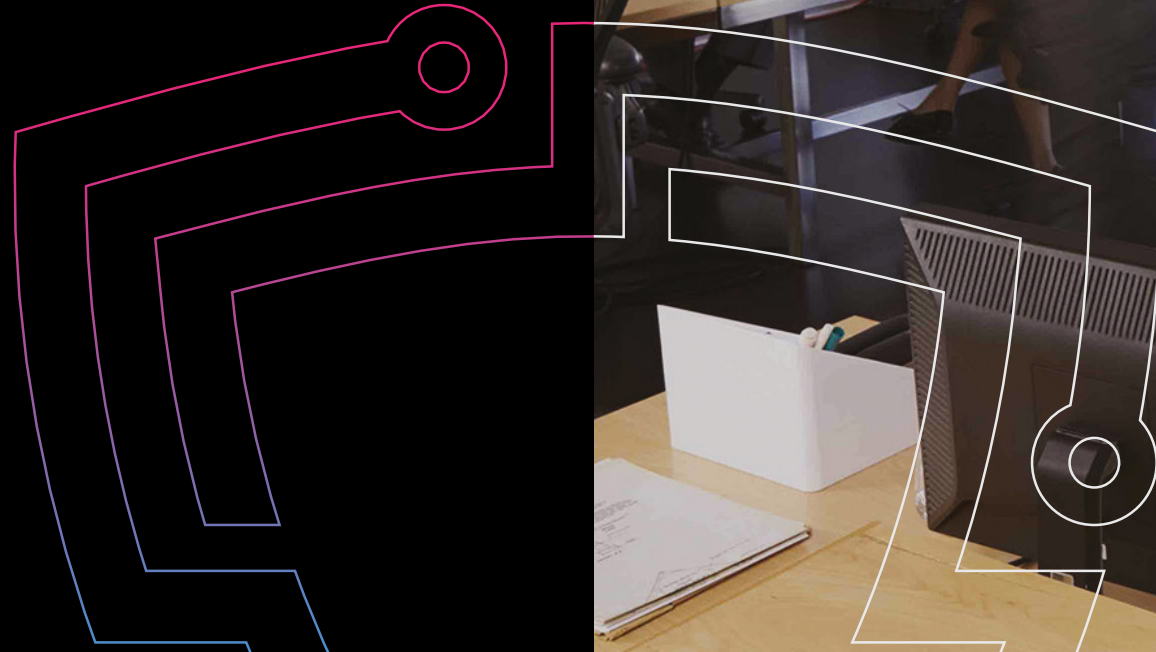

The Focus Shield encompasses the very latest security technologies that you can select and scale as required, providing you with the best tools to elevate efficiency and productivity.

Simply select the Focus Shield and combine any number of the additional products – it's a completely flexible solution. From Anti-Virus Protection to PC & Laptop Cloud Backup to Microsoft 365, we've got it covered. And if you're unsure what will benefit your business best, our Focus Shield experts are on-hand to talk you through a bespoke solution to better support your business needs.

Protect your business with Focus Shield. Designed specifically for firms wanting to focus on driving up revenue, while having total peace of mind that their IT security delivers on protection, reliability and cost.

Build your Focus Shield.

Boost your business!

Health Monitoring & Inventory

Stay connected, anytime, anywhere...

Bringing an enterprise-level tool to the smaller business, the Focus Shield is our core offering - the gamechanger. Its Remote Monitoring & Management (RMM) capabilities allows firms to efficiently monitor and proactively manage your systems, boosting productivity, security, automate maintenance tasks and streamline efficient support.

Downtime is a huge threat to any business and incredibly costly so making sure you're sufficiently protected is key. The Focus Shield sits on your machine giving a birds-eye view of your entire IT estate, silently health-checking your hardware and ensuring everything is properly functioning, fully patched, and in tiptop condition. The Focus Shield delivers total peace of mind.

Key features:

- ✓ Proactive monitoring – making sure your IT equipment is fit for purpose
- ✓ IT maintenance – self-healing capabilities make sure your systems and security are in optimum condition
- ✓ Asset & inventory reporting – complete control over your IT portfolio, ideal for budgeting and compliance
- ✓ Remote machine management – take control anytime, anywhere

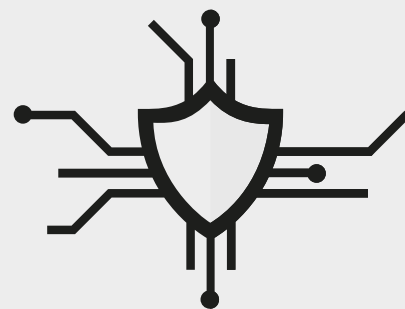

Anti-Virus

Affordable, award-winning protection

Anti-Virus software is critical for every PC. Without it, you risk losing personal information, files and even cash from your bank, wasting valuable time and money.

Stay protected without your PC performance being compromised. Our PC Anti-Virus software is the ultimate solution, a fast, simple and effective way to protect your digital world, always ensuring your PCs are up-to-date with the latest anti-virus software and tools.

Our award-winning cyber security technology is fast, light and invisible, protecting everything that your business values – the perfect efficient endpoint security for small businesses. Simply install and forget!

Key features:

- ✓ End-point protection – secure from targeted attacks, ransomware and file less attacks
- ✓ Cloud-based remote management – saving cost, time and simplifying the protection of your network
- ✓ Light on computer resources
- ✓ Protects you against all types of malware, including viruses, ransomware, worms and spyware.
- ✓ Trusted by over 110 million users worldwide.

Email Protection & Anti-Spam

Block phishing, spoofing, malware & ransomware

To prevent devastating security breaches, you need a powerful, robust and reliable security solution to combat any malicious activity. Our advanced solution protects against the most sophisticated threat, giving you actionable insights to help identify, prioritise and provide recommendations for addressing potential incidents.

Easy to implement and configure, we can have you up and running in no time, secure in the knowledge that our software is continually working to reduce spam, filter out viruses and block phishing emails before they even reach your inbox!

Key features:

- ✓ Industry-leading protection – tried and trusted by businesses of all sizes and sectors
- ✓ 100 per cent protection – total peace of mind
- ✓ Advanced Threat Protection – define policies, gain real-time reports and automated investigation and response capabilities
- ✓ Included in some of the premium Microsoft 365 packages

Mobile Device Management

(MDM)

Complete control over your portable IT estate

Modern businesses don't just rely on computers and laptops; today's workforce operate across a whole host of devices from tablets to smartphones – all of which require carefully considered protection, security and management.

This is where our MDM solution, Hexnode, comes into its own, providing top-notch protection to employees working across various network-connected devices, enabling you to define security, connectivity, privacy and management policies. And it's quick and easy to set up with zero-touch deployment!

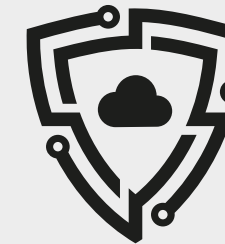

Key features:

- ✓ High impact, low cost – Hexnode is packed full of features, yet easy on the budget
- ✓ Complete control – manage any platform and any device
- ✓ Intelligent automation – benefit from automated device updating, secure browsing, geofencing (virtual perimeter) and real-time monitoring
- ✓ Security – all data, email, network and app security is covered, including auto-lockdown and compliance

Price per device

£2.00

Cloud Backup

Never lose a file again...

Data loss is something any business could do without irrespective of the size. Every company has a data set which is important to them which needs to be protected. We take data backup very seriously at Focus, which is why we have partnered with Acronis to ensure our customers laptops, PC's and servers can be backed easily and safely into our UK Data centres.

Our cloud backup service in the Focus Shield starts at 50Gb of storage space. We can automatically back up all of your files including documents, photos, music or company shared data. We will set a backup schedule to suit you (we normally recommend every 24 hours).

Your data can be easily retrieved at a touch of button without any need for assistance from us. Peace of mind should you ever damage your hardware and need to bring back your important data.

Price per device

£6.50

Key features:

- ✓ 50Gb of remote backup included
- ✓ Scheduled around your calendar (daily / hourly)
- ✓ 30 day retention policy
- ✓ Safe and secure in UK data centres
- ✓ Easy to recover your files

Centralised Email Signature Management

Centrally create and manage professional Microsoft 365 email signatures for all users across all devices.

I think most businesses have been guilty of having a mish mash of different signatures. Different fonts, different logos and sometimes incorrect job titles which are difficult to police.

We have included Centralised Email Signature Management into the Focus Shield because we believe that brand consistency within your email signatures is important. Its also a great way to market your products and direct clients to your social media channels or website.

Centralised Email Signature Management is an email signature management solution that lets you centrally manage Microsoft 365 signatures for all users and devices, via an easy-to-use web portal. Consistent email signatures can be used to increase brand awareness and portray a professional image to recipients.

Key features:

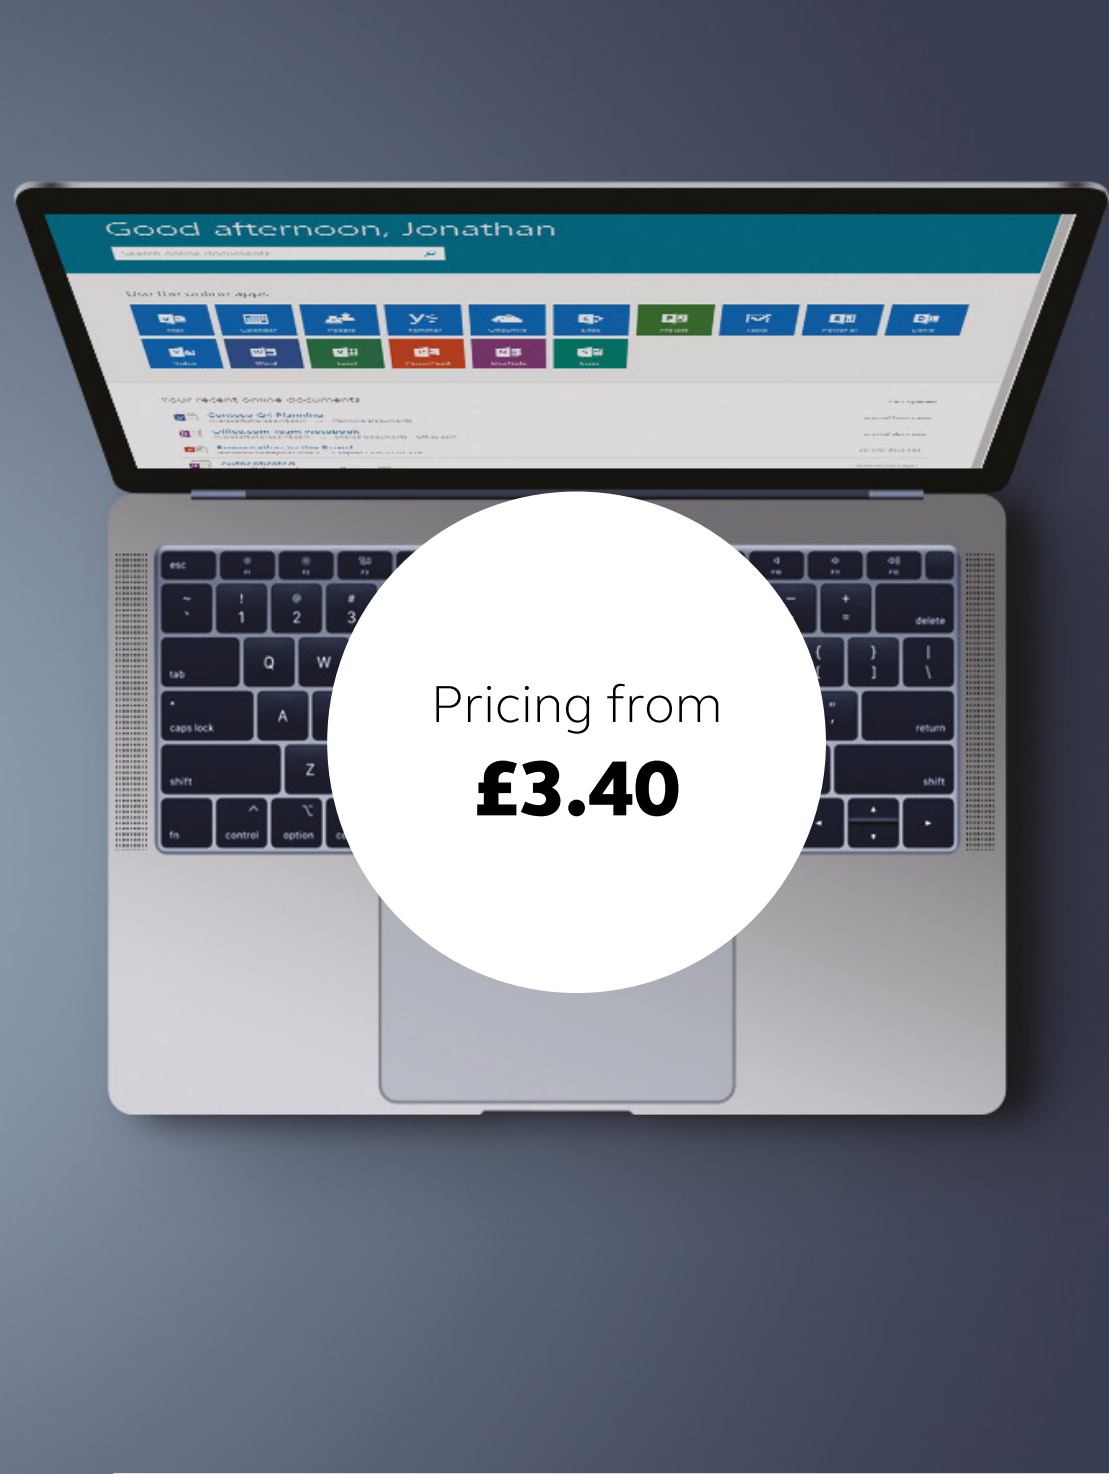

- ✓ Full, dynamic and professional email signatures across any device or mail client, including mobiles and Macs ensuring brand consistency
- ✓ Manage email signatures in our user-friendly interface, and design signatures in our cutting-edge Signature Designer (or choose from our range of ready-made templates)
- ✓ Full integration with your Microsoft 365 Directory providing consistent contact information across all email signatures
- ✓ Easily add trackable elements such as social media icons, promotional banners, email disclaimers and corporate headshots with dedicated URLs to capture data

Price per user

£1.00

*Min. 10 licenses required
£50 setup fee*

Microsoft 365

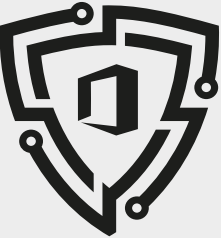

Microsoft 365 is the productivity suite in the cloud that brings together best-in-class Office apps with powerful cloud services and advanced security

Microsoft 365 already forms part of the backbone of thousands of UK companies. Its proven to provide value, reliability and a platform to change the way we work to a more cloud centric way. Focus Group are a Tier 1 Microsoft Cloud Solution Provider meaning we can give our customers advance support and added value when they purchase Microsoft 365 products. For those clients that are already using Microsoft 365 but not with us, we can save you money on your licenses without any migration of downtime!

Microsoft 365 means your business can operate anytime, anywhere and on any device - with all the tools you need to make it happen. Microsoft 365 is a complete, integrated, cloud-based email system design for businesses of all sizes and sectors. All that is needed is connection to the Internet - it's that simple.

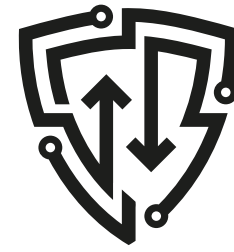

For a fixed monthly cost, per user, you obtain an online mailbox with 50GB of storage, with the opportunity to integrate the full version of Microsoft Office into it as required.

---	--	--

- Key features:
- ✓ Connect employees to the people, information, and content they need to improve productivity and transform collaboration.
 - ✓ Connect with customers and co-workers using Outlook and Exchange.
 - ✓ Keep your team on the same page with chat, online meetings, and calling in Microsoft Teams.
 - ✓ Manage your files from anywhere with 1 TB of OneDrive storage.
 - ✓ Help safeguard your employees, data, and customer information with enterprise-grade security you can trust.

Microsoft 365 Backup Manager

Maintain productivity and compliance in the cloud

If you've made the move to Microsoft 365 you will be reaping the benefits of the cloud. To ensure business continuity and to meet compliance demands, now you must protect your critical data from loss due to ransomware, malware, user mistakes, malicious behaviour, or sync and configuration errors.

Your responsibility to protect corporate data does not change when you migrate to Microsoft 365. Microsoft provides platform protection to ensure they never lose your data, but they cannot protect your data from your employees or external threats.

That's where Backup for Microsoft 365 comes in.

Protecting your organization's data is effortless with Backup for Microsoft 365. It provides accurate, granular data restoration and enables administrators and end users to restore data exactly how it was, reducing costs and meeting RTOs (recovery time objectives).

With Backup for Microsoft 365, you gain full transparency and administrative control over your backup and restore processes. It's designed for a mobile workforce, enabling end users and IT admins to accurately restore data from their desktop, tablet, or mobile device. You won't need to worry about the cost or amount of storage.

Key features:

- ✓ Minimises risk of data loss and assures availability of data
- ✓ Helps meet audit and compliance requirements for backup and recovery
- ✓ Reduces employee downtime by empowering users to easily restore lost data
- ✓ Automated, daily, and on-demand backup
- ✓ Point-in-time backup and accurate, granular restore
- ✓ Cross-user restore from one 365 account to another
- ✓ Industry-leading security
- ✓ Complete status monitoring
- ✓ End user restore capabilities
