

# CYBER SECURITY

Don't let the darker side of the internet threaten your business

# CYBER PROTECT

## Connectivity is crucial, regardless of your business size or sector.

The internet is an indispensable tool and cyber security is more important than ever before to protect data – your own and your customers. Today's threats mean the key tools you need to operate – email, web browsing, cloud computing, WiFi, software and hardware – are all vulnerable to attack.

An online attack can result in your business being exposed to viruses, data breaches, malware, loss of connectivity and in many cases, a financial impact. Your reputation is also at risk if customer data is compromised.

## Why choose Focus Group?

We do it differently. Our commitment to building personal relationships with our customers is what makes Focus Group stand out from the crowd. We'll make it our mission to provide you with:

- ✓ Industry-leading, cost-effective Cyber Security services that won't break the bank
- ✓ Specialist support and maintenance, around the clock
- ✓ Innovative, flexible and secure Cyber Security solutions that will grow with your business
- ✓ Dedicated account management, security training and support
- ✓ Bespoke packages, designed to keep your business secure and connected
- ✓ Seamless installations and remote surveillance
- ✓ Access to the benefits of our premium partnerships with all major networks and suppliers

Plus, we're a friendly bunch! We'd love to spend time getting to know your business so we can find the right solutions to keep your business protected.

# DON'T LET THE DARK SIDE OF THE INTERNET THREATEN YOUR BUSINESS.

Our cyber security experts are here to help. Using powerful, industry leading technology, we'll deliver bespoke cyber security services to protect your business – now and into the future.

We'll use the latest security technologies to review and monitor your IT infrastructure to ensure your systems, your team and your data is protected. At all times.

## Dark Web Monitoring

Compromised data and business credentials available on the dark web can put you at serious risk of suffering a breach. Our experts will review your presence on the dark web and keep you alerted to any new threats.

## Network Inventory

Unmonitored systems can hinder efficiency and become a security risk if left unpatched. Our business-wide IT investigation identifies ineffective hardware and recommends improvements so you can maximise business productivity and stay secure.

## GDPR Awareness

Training your employees on the most current GDPR legislation keeps your business compliant and reduces the risk of an internal data breach. Our online GDPR awareness training course is suitable for all employees and easy to understand.

## Vulnerability Assessment

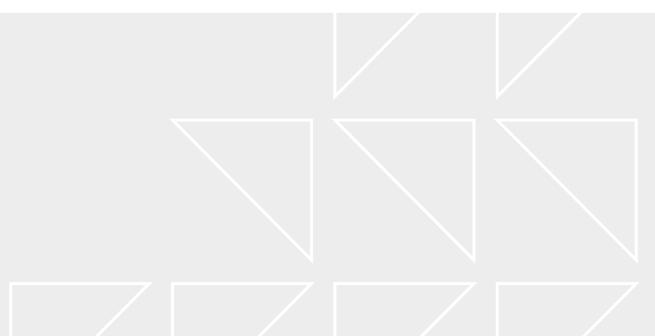

Cyber criminals look for weaknesses in your network and use them to launch an attack. Let our experts find them for you, provide a full report and advise on how to rectify any vulnerabilities.

## Gap Analysis

Improve your resilience against cyber crime with insight from our security experts and receive advice about where you can improve your level of protection.

Reduce the risk of data breaches.  
Don't be a victim. Let's protect together.

# Spotlight on Cyber Security Awareness & Training

Focus Group is a market leading provider of Cyber Security and GDPR Awareness services. We deliver fully managed, comprehensive online training and testing services to ensure your business stays compliant and – most importantly – ensure your employees are cyber aware, your data is kept safe and security risks are minimised.

In a nutshell, we'll deliver cyber security training which ticks all the boxes:

- ✓ **Online e-learning.** Professional, accessible and video-based training
- ✓ **Fully managed** by Focus Group and delivered to your timescales
- ✓ **Comprehensive content** to fully educate your employees and reduce the risk of security incidents
- ✓ **Multiple languages.** Course available in multiple languages with subtitles
- ✓ **Ongoing testing and reporting** to ensure understanding and compliance
- ✓ **Cost effective.** The cost to train and ensure vigilance will always be far lower than the cost of a security breach

Keep your business safe and contact our Cyber Security specialists today.

Here's how just one of our customers benefitted from our Cyber Security services:

## SUMI AGRO

Sumi Agro, part of Sumitomo Corporation, as a global organisation is an attractive target for cyber criminals. When 90% of security incidents and data breaches are caused by staff negligence, Sumi Agro understood that they needed a way of raising staff awareness and keeping staff vigilant to cyber crime. Sumi Agro undertook our fully managed Security Awareness Training and Testing service with the vision of their employees playing a key role in their IT security position.

Security Awareness Training and Testing is a worthwhile investment. It has made a great difference in the way our employees engage with suspicious e-mails. Our helpdesk has received an increase in queries around phishing e-mails, often the Cyber Security Awareness simulated ones but sometimes real attacks. We continue to support staff who need additional help thanks to the monthly reports. Alongside our security technology, we now have a vigilant workforce who play a key part in keeping Sumi Agro secure.

**Pradeep Parmar**  
Group IT Director at Sumi Agro
