

Coty Inc.

Coty gets a communications make over!

Number of Employees: 20,000+

The project

Hybrid working at Coty Inc was being held back by a complex legacy IT estate. When they moved their operation to a new office, the IT team seized the opportunity to modernise its IT operation to deliver new services to its users.

The solution

Focus Group designed and delivered a modern LAN, providing a highly-available communication and collaboration facility. The solution enables employees to work from anywhere, with 24x7 global voice, chat and collaboration capabilities for its employees.

The solution incorporated:

- Cloud-managed Meraki LAN
- Centrally managed platform allowing remote access for admins
- Modern infrastructure enabling hybrid working

The result

Coty has a new state-of-the-art HQ that has enhanced the way employees communicate and collaborate. Focus Group coordinated the entire install, consulting with architects, contractors and Coty's global networking team.

All built on a secure wired and wireless infrastructure that optimises performance, simplifies configuration and eases management, while supporting new collaboration applications.

“For almost a decade, Focus has been Coty’s trusted Cisco partner. Renowned for always getting the basics right, providing considered advice, offering impressive pre-sales knowledge and its ability to offer a quick turnaround on quotes and pricing, Coty knows Focus has the capability and resources required to support its global operations in a timely manner.”.
